Education

University of Rochester

B.S Computer Science

GPA 3.7

Rochester, NY

Sep 2022 - May 2025

Professional Experience

University of Rochester

Undergraduate Research Assistant

Rochester, NY

Jun 2023 - Dec 2024

- Wrote Python scripts to automate experiment workflows (experiment execution and results collection)
- Implemented Python classes for data selection algorithms from research paper specifications
- Participated in weekly standup meetings, and wrote code in a collaborative Agile/Git environment
- Gave technical presentations including a poster presentation at MIT and UR Computer Science Open House

Novanta

Software Engineer Intern

Pittsford, NY

Jun 2023 – Sep 2023

- Contributed to and debugged a GUI application built in PyQt5 and OpenCV
- Programmed a product demo to automatically rotate and photograph test tubes
- Utilized Agile development methodologies in a multi-developed environment
- Utilized Git to successfully complete pull requests and merge feature branches

Personal Projects

Trivia Game

September 2025 -

<https://github.com/mflynn840/trivia-app>

- Full stack Kotlin and Java Spring android application
- Designed a Kotlin GUI frontend with support for login, single player and co-op game play
- Implemented a Java Spring backend (REST controllers) with support for JWT authentication
- Implemented GitHub Actions and unit testing (JUnit)

Punch Lite

Jul 2025 -

<https://github.com/mflynn840/PunchLite>

- Full stack Java Spring and React time clock application
- Implemented unit testing using Junit and MockMVC
- Wrote React and CSS (Bootstrap) scripts for styling the UI
- Utilized the repository, service and controller layers for clean, maintainable backend code

Cash Ninja

March 2025

<https://github.com/mflynn840/CashNinja>

- Designed and implemented an SQL schema to store real time stock prices, user data and transactions
- Implemented PyQt widgets to draw views, graphs, tables and pie charts in the GUI
- Implemented Reactive data population using event listeners
- Utilized MVC design pattern to write maintainable, testable code

Skills

Languages: Python (proficient), Java (proficient), C (proficient), C++ (proficient), SQL (competent), Golang (competent), HTML (competent), Kotlin (competent).

Frameworks: PyQt (proficient), NumPy (proficient), PyTorch (proficient), JSON (proficient), Java Spring (competent), REST Api (competent), React (competent), CSS/Bootstrap (competent), JUnit (familiar).

DevOps: Git (Proficient), Agile (proficient), Git actions (proficient), Jira (familiar), Docker (familiar)
